

SRB Environment Policy 2022

Fazenda Rio Grande, January 01st, 2022.

Basic Policy:

Build a sustainable society, implementing environmental preservation activities and promoting improvements to achieve environmental performance goals.

Through the ESG (Environmental, Social and Corporate Governance), SRB will develop actions to improve the production chain by planning the sustainability strategy involving all employees and related parties.

We commit to:

1. Green: Help to combat global warming and preserve biodiversity through:

- ① Preserve SRB's native area.
- ② Expand green area by planting of 600 tree seedlings

2. Ecology: Helping to build a low-carbon society by promoting global environmental management through:

- ① Reduce CO₂ emissions;
- ② Reduce water consumption;
- ③ Increase effluent reuse;
- ④ Reduce the consumption of chemicals that emit VOC;
- ⑤ Reduce the generation of waste;
- ⑥ Eliminate the sending of waste to landfill;
- ⑦ Develop new alternatives for waste disposal in order to promote the circular economy;
- ⑧ Mitigate negative environmental impacts following legislation and other environmental requirements.

3. 5Rs program: Promote environmental education of own and third-party employees in actions to reduce consumption of natural resources, waste generation and environmental preservation, creating a culture of sustainability:

- ① Support to departments to carry out projects proposing a reduction in the consumption of natural resources, reuse of products or materials, promoting environmental awareness in the community.

4. ESG (Environmental, Social and Corporate Governance): SRB will develop actions to improve the production chain, planning the sustainability strategy and multiplying the SDGs (Sustainable Development Goals) to own and third-party employees.

- ① Carry out CO₂ emission chain mapping according GHG (Green House Gases) Brazilian protocol;
- ② Carry out actions to achieve the objectives of the SDGs.

Yoshinori Wakitani

President da SRB
