

We protect the **environment** by complying with laws and regulations, avoiding pollution, make stress and waste conscious and continuously reduce it.

Principles

- We commit ourselves to leading Lonstroff in an environmentally friendly and sustainable manner.
- We produce with environmentally sound Technologies, where appropriate and feasible.
- We use energy-saving, resource-saving, manufacturing processes.
- Our products are harmless for humans and the environment and can be safely disposed of.
- We are looking for solutions to how our products can be recycled after use.
- We mediate employees basic knowledge about environmental issues.
- We collect and report on resource consumption.
- We carefully choose suppliers who put environmental awareness first, and who operate in sync with our environmental policy.

Remark

The policy is reflected on the LAG homepage and the employees (e.g. flyer) in an appropriate manner.
